

QUICK REFERENCE: AI AGENT SETUP CHECKLIST

Copy & Paste This Into Your AI Agent

You are the Mailman Media Visual Assistant. Generate professional broadcast-quality HTML artifacts.

CRITICAL RULES (NEVER BREAK):

- 1. NO placeholders, "lorem ipsum", "TBD", or empty sections
- 2. ONLY Tailwind CSS utility classes (no custom CSS)
- 3. Single self-contained HTML file
- 4. Exact colors: #1B365D (navy), #C8102E (red), #E8DCC6 (cream)
- 5. Working JavaScript for tab switching
- 6. 4-5 tabs minimum with complete content in each

REQUIRED STRUCTURE EVERY TIME:

- Header with logo + title + date
- 4-6 metric cards in grid
- Tab navigation (Match Summary, Statistics, Tactical, Players, Next Match)
- Tab content sections (all filled)
- Footer with attribution

For "post match analysis" ALWAYS include:

- Final score and goal timeline
- Key statistics comparison
- Tactical breakdown
- Player ratings (all 11 starters)
- Next match preview

QUALITY BAR: Must look like professional sports broadcast graphics

Test Your Agent With These Prompts

Test 1: Basic Post-Match

Create a post-match analysis for Liverpool's 2-1 loss to Crystal Palace on September 27, 2025.

Expected Output:

- 5 tabs with complete content
- Match timeline with 3 goals
- Statistics comparison
- Player ratings for all 22 players
- Next match preview (Chelsea)

Test 2: Statistical Analysis

Analyze Liverpool's defensive vulnerabilities with statistics and metrics.

Expected Output:

- Thesis statement at top
- 6-8 defensive metrics
- Progress bars showing performance
- Confidence levels (e.g., 85%)
- Predictions based on data

Test 3: Match Preview

Preview Chelsea vs Liverpool on October 4, 2025 with predictions.

Expected Output:

- Match details card

- Form analysis for both teams
 - Key matchups section
 - 4 predictions with confidence %
 - Risk factors
-

Visual Quality Checklist

Your AI agent's output should have:

✅ Professional Look

- Gradient backgrounds
- Glass morphism effects (backdrop-blur)
- Hover effects on cards
- Smooth transitions

✅ Brand Consistency

- Navy background (#1B365D)
- Red accents (#C8102E)
- Cream highlights (#E8DCC6)
- Mailman Media logo

✅ Rich Content

- 4-6 metric cards at top
- 5 content tabs
- Progress bars for metrics
- Comparison grids
- Complete information (no gaps)

✅ Interactive Elements

- Working tab switching
 - Hover states
 - Responsive design (mobile-friendly)
-

Common Mistakes to Fix

❌ If you see this in output:

- "Lorem ipsum" → Regenerate with real content
- Empty tabs → Add complete content
- Custom CSS classes → Use only Tailwind utilities

- Broken tab switching → Check JavaScript
- Missing metric cards → Add 4-6 cards
- No footer → Add Mailman Media attribution

Color Codes Reference

CSS

```
/* Primary Colors */
--navy: #1B365D;
--red: #C8102E;
--cream: #E8DCC6;

/* Secondary Colors */
--blue: #3498DB;
--green: #2ECC71;
--amber: #F39C12;
--alert-red: #E74C3C;

/* Gradients */
background: linear-gradient(135deg, #1B365D 0%, #2C5282 100%);
background: linear-gradient(to right, #C8102E, #DC143C);
```

Essential Tailwind Classes

Layout:

- max-w-6xl mx-auto - Container
- grid grid-cols-2 md:grid-cols-4 gap-4 - Metric grid
- flex justify-between items-center - Inline elements

Cards:

- bg-white/10 backdrop-blur-sm rounded-xl p-6 - Glass card
- border border-white/20 - Subtle border
- hover:bg-white/15 transition-all duration-300 - Hover effect

Text:

- text-4xl font-black - Large numbers
- text-sm text-white/80 - Body text
- font-bold text-white - Headers

Colors (inline style):

- style="color: #C8102E;" - Red text
- style="background: rgba(192, 57, 43, 0.2);" - Red background

Metric Card Template

html

```
<div class="bg-white/10 backdrop-blur-sm rounded-xl p-6 hover:bg-white/15 transition-all duration-300 bo
  <div class="text-4xl font-black mb-2" style="color: #F39C12;">87%</div>
  <div class="text-sm font-semibold text-white/90 mb-2">Metric Name</div>
  <div class="text-xs font-bold px-2 py-1 rounded-full inline-block"
    style="background: rgba(46, 204, 113, 0.2); color: #2ECC71;">
    +12%
  </div>
</div>
```

Tab Switching JavaScript

javascript

```
<script>
function showTab(tabId) {
  document.querySelectorAll('.tab-content').forEach(tab => {
    tab.classList.add('hidden');
  });
  document.getElementById(tabId).classList.remove('hidden');

  document.querySelectorAll('button[id^="btn-"]').forEach(btn => {
    btn.style.backgroundColor = 'rgba(255, 255, 255, 0.1)';
    btn.style.color = 'rgba(255, 255, 255, 0.7)';
  });

  document.getElementById('btn-' + tabId).style.backgroundColor = '#C8102E';
  document.getElementById('btn-' + tabId).style.color = 'white';
}

window.addEventListener('DOMContentLoaded', () => showTab('summary'));
</script>
```

Success Indicators

Your AI agent is working correctly if:

1.  Output is 300+ lines of HTML
 2.  All 5 tabs have unique, complete content
 3.  Tab switching works when clicked
 4.  No "lorem ipsum" or placeholders anywhere
 5.  Colors match Mailman Media brand
 6.  Looks professional on mobile and desktop
 7.  Could be used in live broadcast immediately
-

Integration With Replit

1. **Save** AI agent output as HTML file
2. **Test** in browser locally

3. **Load** into your Live Presentation Control
 4. **Verify** all tabs and interactions work
 5. **Deploy** to live stream overlay
-

Next Steps

1. Copy full instructions artifact into your AI agent system
2. Test with 3 sample prompts above
3. Verify output quality matches "Improved Example"
4. Iterate on prompts until consistent quality
5. Integrate with your Replit production control

Quality Bar: Every output should make you say "This could be on ESPN/Sky Sports right now."
